

Application:

The IVS brush system is built in modular construction and can be extended at any time, it is easy-to-mount and as well easy to adjust for any dirty areas.

It is equipped with adjustable dirt hoods incl. removable lid. Any additionally required protective equipment as well as eventual devices are to be provided by the customer.

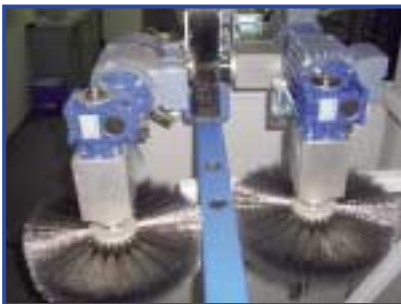

The IVS brush system is appropriate for any merchantable conveyors and is best appropriate for the use for any dirty areas due to its compact structural shape, robust type and variable adjustment – **conveyor chains – traverses – suspension tackles**.

For the optimum dirt removal and corresponding to any type and adhesion of the dirt, brushes with different dimensions and trimmings are available.

The cleaning is performed automatically by passing through the machine in addition to the **IVS Powerclean wet cleaning** or separately as dry cleaning.

We offer the complete cleaning also as service.

Example for application brush cleaning:

IVS-HR-S2
Cardan chain on both sides + bottom
Trimming: SS wire/dragging Nylon

IVS-HRV 3
Cardan chain
On both sides + top
Trimming: SS wire

IVS-HR 2
Cardan chain on both sides
Trimming: dragging Nylon

IVS-HR 2
Turning suspension tackles on both sides
Two-way brush: Nylon

IVS-HR 2
Plug chain on both sides
Trimming: dragging Nylon
