

- user-friendly complete station
- contact less barrier discharge with two or three ceramic electrode bars
- Al-roller suitable for all plastic films and metal foils (in change)
- speed to about 200 m/min

Technical information:

- electr. power using three bars:

200 mm	600 W	(V06)
400 mm	1200 W	(V13)
600 mm	1800 W	(V20)
- power continuously adjustable
- guiding rollers with adjustable position
- treatment roller \varnothing 100 mm with ceramic wear protection layer
- integrated rotation control
- connection: 230 V; 50/60 Hz

Options:

- two side treatment
- two or three electrode bars
- web width up to 200, 400 or 600 mm
